Deliberative Process/Ex. 5 At a meeting later in the day, the State of Colorado described their estimates of the projected loading from discharges from this facility and its relationship to water quality standards. Melanie has Sunnyside's proposed sampling plan if you are interested.

Vern Berry provided insight into the mining general permit history under the Clean Water Act, from 1991 to the present. The most recent draft, generated by the Departments of Interior and Agriculture, was submitted to Headquarters in November. General principles for the general permit and Region VIII's specific comments are available from Vern.

Dale Vodehnal gave an update of the EPA/Forest Supervisors' meeting in early November.
